

Quick Start Guide

For Parrot PS7000 Bluetooth® Hands-Free Car Kit

Congratulations on the purchase of your new Parrot car kit! We know it will provide you with years of enjoyable, trouble-free and hands-free phone calls, enabling you to keep your hands on the wheel, eyes on the road.

Premium Features & Technical Specifications:

- Universal cell phone compatibility
- Software updates
- Parrot voice recognition, noise reduction and echo cancellation
- Full duplex conversations
- Caller's voice heard over car speakers with automatic mute during calls
- Maximum paired devices: 3
- Phonebook capacity/paired phone: 150
- Total phonebook capacity: 450
- Caller ID: "audible" when voice tags have been created
- Easy-switch to cell phone for privacy

Initial activation

Getting started

Turn on the car ignition. Turn on your cell phone.

Pairing

On your phone, find your *Bluetooth* options from your phone menu.

Select **SETTINGS** (or **TOOLS**); Select **CONNECTIVITY** then **BLUETOOTH**.

Select **SEARCH/ADD** a new *Bluetooth* (Hands-free) **DEVICE** (menu options will vary).

When the searching function is complete, select the PS7000.

Your phone will ask you for a PIN code; Enter 1234.

You can now phone a friend! To make a call, dial a number on your phone.

You will hear your friend's voice over your car speakers.

To end the call, press the red button on the car kit or your phone.

NOTE: Once the car kit is paired with your cell phone, it will automatically connect to your phone each time you start your car.

How to use the dash-mounted control

1 Rotating Knob

- Use this knob button to navigate through the PS7000 menus.
- Push this knob button to select an option: LANGUAGE, VOLUME, ADD VOICE TAGS, RECORD KEYWORDS, UPDATE SOFTWARE.
- Volume control during a call.

2 Green Button

- Press to make a call or answer an incoming call.

- During a call, press to put one call on hold and answer a second incoming call.
- To switch a call in private mode, press the green button during conversation; to switch back to hands-free mode, press the green button during conversation.
- Hold for 2 seconds to dial the last number called.
- Press this button to activate voice recognition.

3 Red Button

- While browsing in the menus, press to exit the menus.
- Press to hang up a call.
- Press to reject a call.

How to reset

To erase the memory of the car kit, press the red and green button at the same time. You may hear “Memory erasing in progress – Please wait”.

Placing a call using voice recognition

First, the cell phone must be paired and connected to the PS7000.

Recording the voice tag

- It is important to first record the car kit keywords: “Phone”, “Hang up” (not necessary), “Home”, “Work”, “Cellular”, “General”, “Other”, “Preferred” in the Parrot menu RECORD KEYWORDS.
- To send a contact, go into the Parrot Menu ADD VOICE TAGS.
- From the cell phone, select a contact, select OPTIONS MENU and choose SEND, VIA BLUETOOTH to the car kit. When the contact is received, the training procedure will start. Follow the instructions.

Placing the call

- To place a call using voice recognition for a contact with only one phone number: Say “Phone” (or press the green button of the PS7000), you will hear a “bip”, say (name of the contact) and the car kit will initiate a call for the associated contact phone number.
- To place a call using voice recognition for a contact with several phone numbers (home, work, cell): Say “Phone” (or press the green button of the PS7000), you will hear a “bip”, say (name of the contact), you will hear another “bip”, then say “Cellular” and the car kit will initiate a call for the associated contact phone number. If you wish to call this contact at home, you will have to say “Home” instead of “Cellular”.
